

## Relocating Residence

We live in a transient society; in fact, over forty million Americans relocate each year.

Students changing apartments, job relocation and millions of Americans buying second homes opens another window of opportunity for identity theft.

Your policyholders/members increase their risk of identity theft each time they relocate either permanently or seasonally.

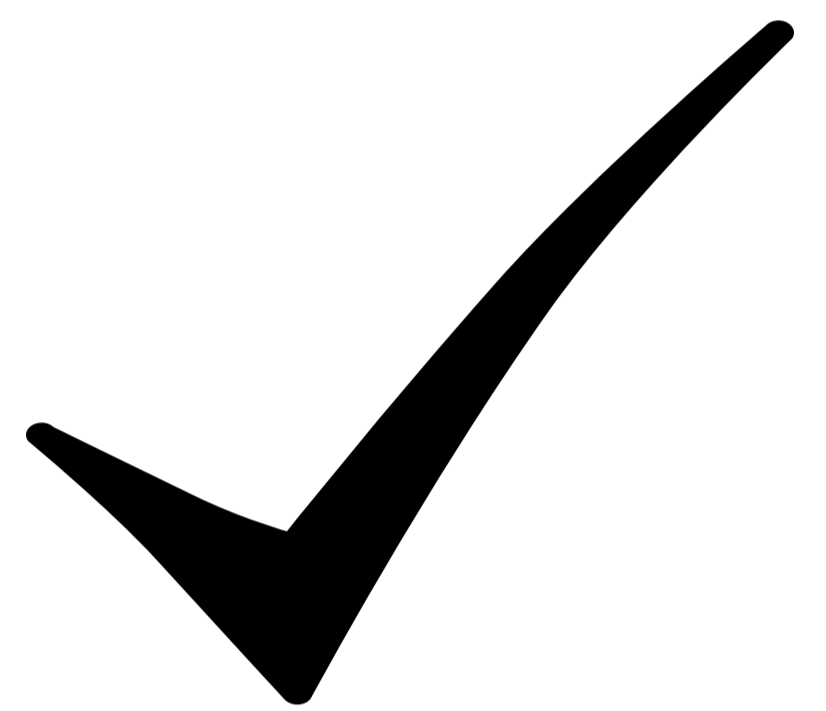

ID Resolution's "On the Move" service is designed to be proactive in nature.

Our fraud specialist will provide your policyholder/member with a checklist of issues to be considered during their move.

We will assist the policyholder/member with change of address letters to help forwarding mail from utility companies, financial institutions and so on.

Should sensitive documents be misplaced during the move, our fraud department will assist with their replacement.

We will suggest that the policyholder contact us for an Identity Wellness Checkup a few weeks after completing their move to ensure a seamless transition.
